

Fix Auto Configuration

Fix Auto are moving to doing job deployment via CAPS. This involves sending job offers to the bodyshops and the bodyshop (regardless of their management system or Fix Auto Status) sending limited updates back to fix via CAPS. Typically this will involve little more than just the bodyshop's Accept or Reject messages.

So there are two factors in the way a Fix Auto site gets set up:

- Is the site a Fix Auto Franchisee
- Is the site a Fix Auto Subcontractor

All Fix Auto Franchisees

Fix Auto Franchisees will have received and accepted invitations to connect to 'Fix Auto UK' and to 'Fix Auto Franchisee'. The sites should be set up to handle the insurer codes listed below

All Fix Auto Subcontractors

Fix Auto subcontractors will have received and accepted invitations to connect to 'Fix Auto UK' and to 'Fix Auto Subcontractor'. The sites should be set up to handle the insurer codes listed below.

The Fix Auto Insurer Codes
